April 2023

PCN (Product Change Notification) reference: **2023/01**

Subject: **Change to dimensional specification of V9000**

Dear Customer,

This notification letter is to advise you of a change in the dimensional specification of Knowles Voltronics part number V9000.

The specification length of the body of the part will be extended to account for the potential of tolerance build up and a small increase in nominal length. The overall footprint will remain the same with the stator end of the body being shorter than the extension of the surface mount J lead.

Original Dimension: 0.47” ± 0.14”
New Dimension: 0.49” ± 0.16”

We will accept last time buys prior to the dimensional change. We require these to be ordered within 3 months of issuance of this PCN and shipped within 6 months.

Should samples be required these may be available on a by request basis, please contact customer service in this instance. Samples where provided will be on cut tape.

If you require further information, please contact the Trimmers and Non-Magnetic Product Line Director, Matt Ellis email matt.ellis@knowles.com .

Yours sincerely,

Matt Ellis
Product Line Director, Trimmers and Non-Magnetic Products

PCN Details

PCN reference:	2023/01
PCN Issue Date:	28/04/2023
Product:	Voltronics Sapphire Multi-Turn Trimmer V9000
Change Description:	Change to body length dimension
Reasons for Change:	Increase of body length and allowance for tolerance build up
Changes to Form, Fit or Function:	Body length increase of 0.02”, no change to footprint, no change to electrical specification.
Changes to Quality or Reliability:	None.
Changes to Voltronics Part Numbers:	None.
Proposed First Ship Date:	October 1st 2023
Qualification Results:	Available on request
Are Samples Available?	Limited samples may be available on request
