Description

The PE2WAN284-20NF standard gain horn antenna (also known as waveguide horn) from Pasternack is part of our comprehensive selection of waveguide antennas. This standard gain horn is mated with a WR-284 to N female waveguide to coaxial adapter and operates from 2.6 GHz to 3.95 GHz.

Our PE2WAN284-20NF standard gain horn antenna with pre-installed L mount has a nominal gain of 20 dBi with a Horizontal and Vertical HPBW (Half Power Beam Width) of 17.5 dB and 17.3 dB respectively. Pasternack's N female to WR-284 standard gain horns are available in 10, 15 and 20 dBi models with pyramidal shape and connectorized input.

Waveguide antennas, such as the PE2WAN284-20NF are used in a wide variety of applications due to the high-power handling capability, low loss, high directivity, and near constant electrical performance. Our WR-284 waveguide antennas with N female interface is part of over 40,000 RF, microwave and millimeter wave components from Pasternack available worldwide and ship same day.
